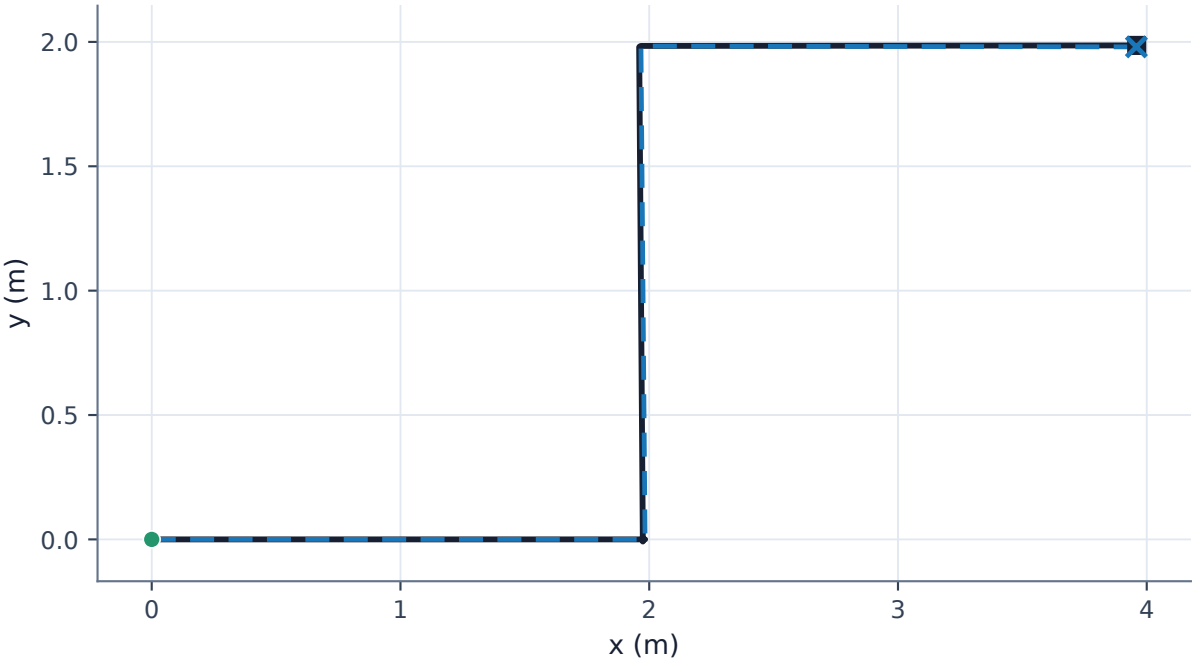
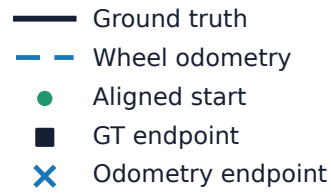
Baseline Wheel Odometry

Ground truth comparison | Three straights and two turns

(a) Planar trajectory





Position RMSE

7.30 mm

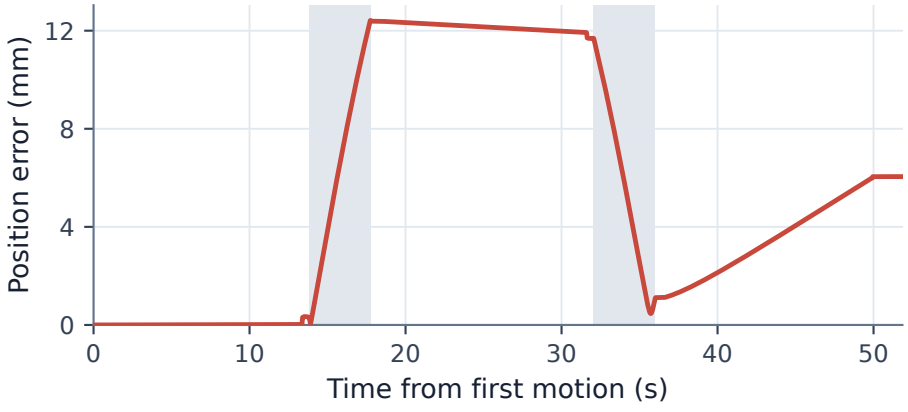
Endpoint position error

6.05 mm

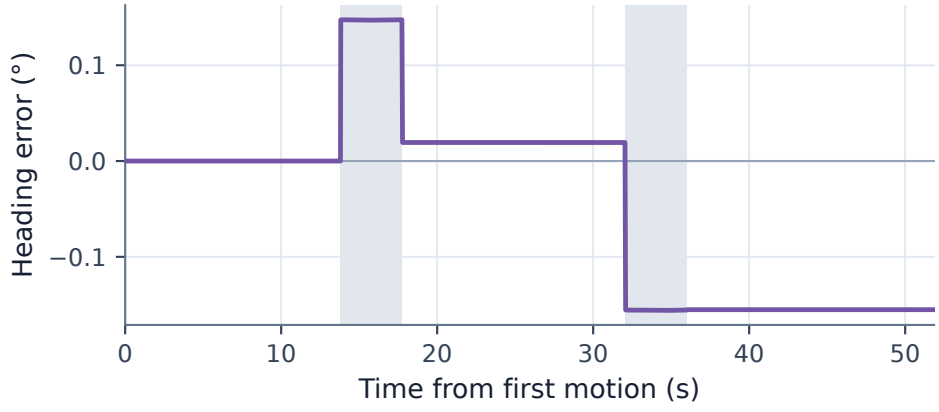
Heading RMSE

0.105°

(b) Position error



(c) Heading error



Shaded intervals: left and right turn commands.

One fixed initial pose alignment per trajectory; no added wheel noise. Heading error is wrapped to [-180°, 180°].
