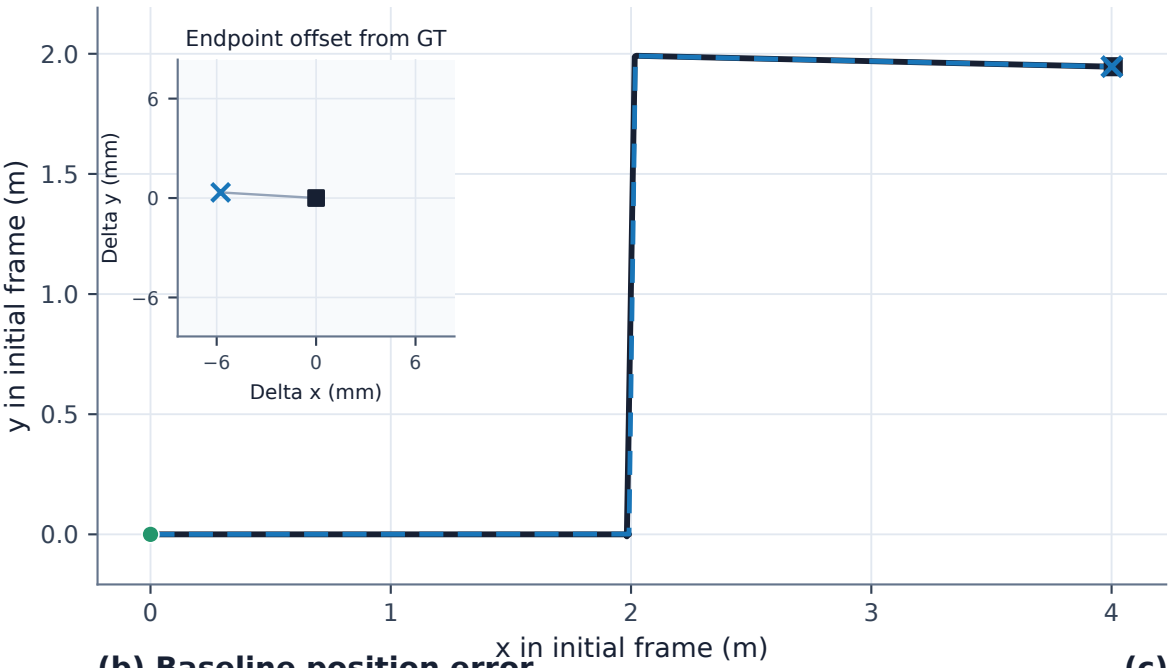
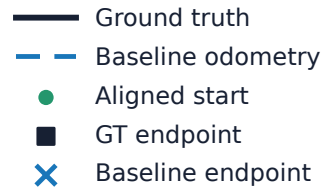
Baseline Wheel Odometry: Residual Error

No added wheel measurement error | online_A3_seed0_run_01

(a) Baseline and ground truth





Position RMSE

6.836 mm

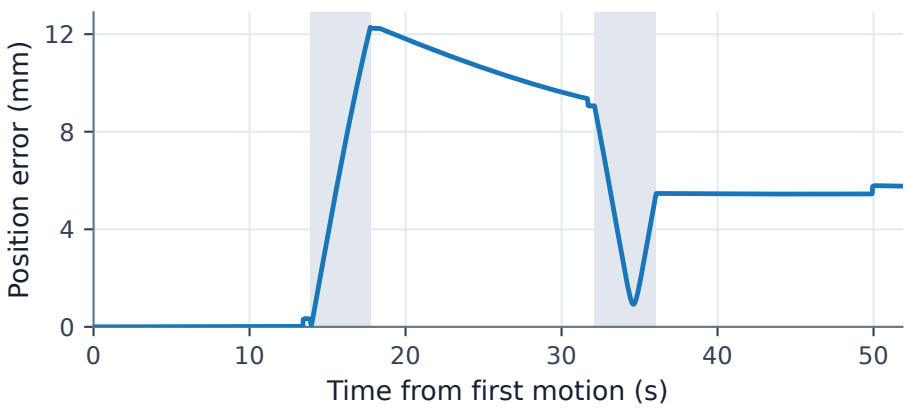
Endpoint position error

5.770 mm

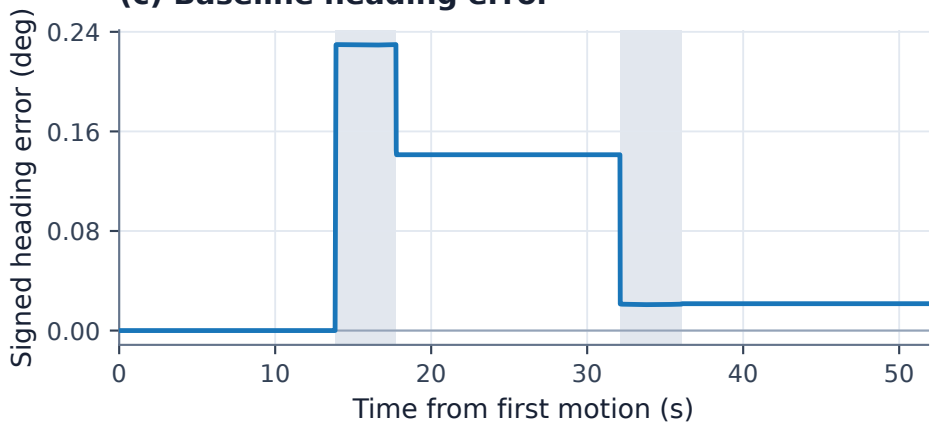
Heading RMSE

0.0982 deg

(b) Baseline position error



(c) Baseline heading error



Current recorded simulation run; baseline has no added wheel measurement error. Shaded intervals: commanded turns.

Inset: exact endpoints translated to the GT endpoint (origin); true offsets are shown in mm. Trajectory coordinates are unchanged.

One fixed initial SE(2) alignment per trajectory; GT is used only for evaluation. Heading error is wrapped to [-180 deg, 180 deg].
